

Welcome Back - September 2020

This week has seen a very positive start to the new school term, one unlike any other. Year 7 and 12 students joined us for their induction days and years 8, 9, 10 and 11 came into school for their induction sessions in a very positive manner. We were delighted to have them all back in school.

The new uniform and the new look to the school made us all so proud and excited for the new school year. We have much to do but have already made such a positive start. Our new website www.chaseterraceacademy.co.uk has lots of important information about our ambitious curriculum and the knowledge organisers that support students in each of their subject areas.

Every student has now had an induction session delivered by their form tutor, which explains all of the changes we have implemented, including the changes to break and lunchtimes and where students can go at these times.

We have tried to make the most of our outside areas for break and lunch as much as possible but recognize the British weather may not always be kind! If the weather is bad, we have made arrangements for students to go to their next classroom for break/lunch. This does rely on students being respectful of classes that will be going on at that time. Students must remain in their designated seats and not move class arrangements around at any time.

Students in year 12 and 13 are in one bubble and have arrangements for study periods in place. Please speak to Mr Giles or Mr Lloyd if you have any questions about 6th form study. We welcome Mr Lloyd to the 6th form team as he covers Ms Humphries role whilst she is on her maternity leave.

I am very pleased to announce that Miss Clenton has been appointed as our new Head of House at Chase Terrace Academy. We are very excited about this new role and will update you soon about the new House System that we have been busy planning.

As we start our first full week with all students please can I ask you all to continue to talk to your children about the importance of the procedures we have in place and to remind them to maintain good hand hygiene whilst at school. It is important that students continue to behave responsibly to support good health in all year groups as well as in staff, parents, grandparents and our wider community. If anyone in your household should become ill with a continuous cough, fever, or loss of taste/smell please call 119 and book a test as soon as possible. The www.gov.uk website has full information about what to do should you, or someone in your household, develop symptoms.

We will post regular updates on the school website and via the new school communication platform – MyEd App. Information about MyEd App will be sent out this week. Please download this as soon as possible as all of our updates and information will be sent via this platform.

Kind regards

Ms Mason - Head of School
