

## Year 10 Higher: Curriculum Implementation Plan

Mathematics – Year 10 Higher – Overview				
Knowledge and Skills – Students will be taught to...	Reading, Oracy, Literacy	Formative Assessment	Summative Assessment	Link to GCSE Content
Please see individual units below.	<ul style="list-style-type: none"> <li>• Reading worded questions to understand the context and decide how to approach a problem</li> <li>• Paired discussion of problems</li> <li>• Writing responses to worded questions such as “Explain why...”</li> <li>• Expanding vocabulary of key mathematical terms</li> <li>• Giving verbal responses in class question-and-answer</li> </ul>	<ul style="list-style-type: none"> <li>• Questioning in class</li> <li>• Self-assessment</li> <li>• Peer-assessment</li> <li>• Starter and homework questions</li> <li>• Mini-tests</li> <li>• Show of hands and other forms of whole-class feedback</li> <li>• Review of student work during lessons</li> <li>• Mini-whiteboards</li> </ul>	Whole-class assessments towards the end of each term, based on work completed during the year to date.	Please see individual units below.

Mathematics – Unit 1 – Algebra 1	
Knowledge and Skills – Students will be taught to...	Links to KS4 National Curriculum (red) & Exam board specification (blue/black)
<ul style="list-style-type: none"> <li>Expand with more than 2 terms in a bracket e.g. <math>(x + 3)(x^2 + 3x - 5)</math> (REVISION)</li> <li>Expand the product of three binomials</li> <li>Know the difference between an equation and an identity (REVISION)</li> <li>Create a mathematical argument to show that two expressions are equivalent (to prove an identity)</li> <li>Change the subject of a formula that involves powers or roots</li> <li>Change the subject of a formula when the required subject appears twice</li> </ul>	<a href="#">Expand product of two binomials</a> <b>Expand products of more than two binomials</b> <a href="#">Rearrange formulae to change the subject, including cases where a reciprocal of the subject appears</a> <a href="#">Rearrange formulae to change the subject in cases where the subject appears twice</a> <b>Use algebra to support and construct arguments</b> <b>Argue mathematically to show algebraic expressions are equivalent</b> <a href="#">Use algebra to construct arguments</a> <a href="#">Show algebraic expressions are equivalent</a> <b>Use algebra to construct proofs and arguments</b>
Mathematics – Unit 2 – Trigonometry	
Knowledge and Skills – Students will be taught to...	Links to KS4 National Curriculum (red) & Exam board specification (blue/black)
<ul style="list-style-type: none"> <li>Use sin, cos and tan to find missing sides and angles (REVISION)</li> <li>Use basic trigonometry to solve problems in context</li> <li>Practise giving answers to an 'appropriate degree of accuracy' in this context</li> <li>Know the exact values of <math>\sin \theta</math> and <math>\cos \theta</math> for <math>\theta = 0^\circ, 30^\circ, 45^\circ, 60^\circ</math> and <math>90^\circ</math></li> <li>Know the exact values of <math>\tan \theta</math> for <math>\theta = 0^\circ, 30^\circ, 45^\circ</math> and <math>60^\circ</math></li> <li>Use the Sine Rule to find a missing side or angle in a non-right-angled triangle</li> <li>Know and use the Cosine Rule to find a missing side or angle in a non-right-angled triangle</li> </ul>	<b>Link trigonometric ratios to similar triangles</b> <b>Apply trigonometric ratios to find angles and lengths in right-angled triangles in 2D</b> <b>Know the exact values of <math>\sin \theta</math> and <math>\cos \theta</math> for <math>\theta = 0, 30, 45, 60, 90^\circ</math>; know the exact value of <math>\tan \theta</math> for <math>\theta = 0, 30, 45, 60^\circ</math></b> <a href="#">Recall and use the trigonometric identities for right-angled triangles</a> <a href="#">Know and apply the trigonometric ratios, <math>\sin \theta</math>, <math>\cos \theta</math> and <math>\tan \theta</math> and apply them to find angles and lengths in right-angled triangles in 2D figures</a> <a href="#">Know the exact values of <math>\sin \theta</math> and <math>\cos \theta</math> for <math>\theta = 0^\circ, 30^\circ, 45^\circ, 60^\circ</math> and <math>90^\circ</math>; know the exact value of <math>\tan \theta</math> for <math>\theta = 0^\circ, 30^\circ, 45^\circ</math> and <math>60^\circ</math></a> <b>Know and apply the sine rule and cosine rule to find lengths and angles</b>
Mathematics – Unit 3 – Powers & Roots	
Knowledge and Skills – Students will be taught to...	Links to KS4 National Curriculum (red) & Exam board specification (blue/black)
<ul style="list-style-type: none"> <li>Estimate squares of decimal numbers up to 10</li> <li>Estimate cubes of decimal numbers up to 5</li> <li>Estimate square roots of numbers up to 150 and cube roots of numbers up to 20</li> <li>Know and use the fact that <math>a^{1/n} = \sqrt[n]{a}</math></li> <li>Know and use the fact that <math>a^{n/m} = (\sqrt[m]{a})^n</math> to evaluate expressions</li> </ul>	<b>Calculate with fractional indices</b> <b>Use fractional indices to represent roots and combinations of powers and roots</b> <b>Calculate fractional powers</b> <b>Estimate powers and roots e.g. <math>\sqrt{51}</math> to the nearest whole number</b> <b>Calculate with roots</b>

<ul style="list-style-type: none"> <li>• Calculate with standard form with and without a calculator (REVISION)</li> <li>• Practise GCSE-style problems involving standard form in context</li> <li>• Know the definition of a surd and a rational/irrational number</li> <li>• Add and subtract simple expressions involving surds e.g. <math>5\sqrt{3} + 2\sqrt{3} - \sqrt{3}</math></li> <li>• Understand and use multiplication of simple surds e.g. <math>\sqrt{5} \times \sqrt{7}</math></li> <li>• Simplify a surd e.g. <math>3\sqrt{50} = 3 \times \sqrt{25}\sqrt{2} = 15\sqrt{2}</math></li> <li>• Expand a single or double bracket involving surds</li> <li>• Understand and use division of simple surds e.g. <math>\frac{2\sqrt{50}}{\sqrt{10}} = 2\sqrt{5}</math></li> <li>• Rationalise a fraction where the denominator is a single term e.g. <math>2\sqrt{7}</math></li> <li>• Apply Pythagoras' theorem to problems involving surds</li> </ul>	<p>Calculate with numbers in standard form</p> <p><b>Estimate powers and roots of any given positive number</b></p> <p><b>Calculate exactly surds</b></p> <p><b>Simplify surd expressions involving squares e.g. <math>\sqrt{12}</math></b></p> <p><b>Rationalise denominators of surds</b></p> <p><b>Estimate powers and roots e.g. <math>\sqrt{51}</math> to the nearest whole number</b></p> <p><b>Use surds in exact calculations without a calculator</b></p> <p><b>Simplify expressions with surds, including rationalising denominators</b></p>
<b>Mathematics – Unit 4 – Linear Inequalities</b>	
<b>Knowledge and Skills – Students will be taught to...</b>	Links to KS4 National Curriculum (red) & Exam board specification (blue/black)
<ul style="list-style-type: none"> <li>• Understand the situations in which an inequality is reversed</li> <li>• Extend solving linear inequalities to negative terms of the unknown e.g. <math>20 - 3x &lt; 8</math></li> <li>• Represent the solution of a linear inequality using set notation</li> <li>• Find the set of integers that are solutions to an inequality, including using set notation</li> <li>• Continue to solve problems by constructing and solving linear inequalities in one variable</li> <li>• Solve a simple three-part inequality e.g. <math>10 &lt; 3x + 9 &lt; 40</math></li> </ul>	<p>Solve linear inequalities in one variable, representing the solution set on a number line</p> <p><b>Represent the solution to an inequality using set notation</b></p> <p><b>Express solutions to inequalities in set notation e.g. <math>\{x: x &lt; 3\}</math></b></p> <p><u>Solve linear inequalities in one variable, expressing solutions on a number line using the conventional notation</u></p> <p>Understand and use the symbols <math>&lt;</math>, <math>\leq</math>, <math>&gt;</math> and <math>\geq</math></p>
<b>Mathematics – Unit 5 – Transformation</b>	
<b>Knowledge and Skills – Students will be taught to...</b>	Links to KS4 National Curriculum (red) & Exam board specification (blue/black)
<ul style="list-style-type: none"> <li>• Identify and describe a single transformation, given two congruent 2D shapes (i.e. rotation, reflection, or translation)</li> <li>• Know that rotation, reflection and translation produce a congruent image, whereas enlargement produces a similar image</li> <li>• Enlarge a 2D shape using a negative scale factor and a centre of enlargement</li> <li>• Identify the scale factor and centre of an enlargement with a negative scale factor</li> <li>• Perform a sequence of two or more transformations on a 2D shape and fully describe the single transformation that would be the equivalent</li> <li>• Identify points/lines that are invariant under a given transformation</li> <li>• Practise a variety of higher-tier GCSE transformation questions</li> </ul>	<p><b>Describe the changes and invariance achieved by combinations of rotations, reflections and translations</b></p> <p>Describe translations as 2D vectors</p> <p>Use x- and y-coordinates in plane geometry problems, including transformations of simple shapes</p> <p>Perform a specified translation using a column vector</p> <p>Identify the mirror line of a reflection from a shape and its image</p> <p>Use a column vector to describe a translation</p> <p><u>Identify a mirror line <math>x=a</math>, <math>y=b</math>, <math>y=x</math> or <math>y=-x</math> from a simple shape and its image under reflection</u></p>

<ul style="list-style-type: none"> <li>• Solve more complex problems involving similarity, linked to enlargement</li> <li>• Understand the implications of enlargement on area and volume</li> <li>• Move freely between scale factors for length, area and volume</li> <li>• Solve practical problems involving length, area and volume in similar figures</li> </ul>	<p><a href="#">Identify the centre, angle and direction of a rotation from a simple shape and its image under rotation</a></p> <p><b>Perform a sequence of isometric transformations (reflections, rotations or translations), on a simple shape; describe the resulting transformation and the changes and invariance achieved</b></p>
<b>Mathematics – Unit 6 – Quadratics 1</b>	
<b>Knowledge and Skills – Students will be taught to...</b>	Links to KS4 National Curriculum (red) & Exam board specification (blue/black)
<ul style="list-style-type: none"> <li>• Identify and interpret roots, intercepts and turning points of quadratic functions from their graphs</li> <li>• Find approximate solutions to equations of the form <math>ax^2 + bx + c = 0</math> (roots) using a graph</li> <li>• Find approximate solutions to equations of the form <math>ax^2 + bx + c = k</math> using a graph</li> <li>• Find approximate solutions to equations of the form <math>ax^2 + bx + c = dx + e</math> using the point of intersection of a line and a curve on a graph</li> <li>• Factorise a quadratic expression of the form <math>ax^2 + bx + c</math></li> <li>• Factorise a difference of two squares of the form <math>ax^2 - c</math></li> <li>• Solve a quadratic of the form <math>ax^2 + bx + c = 0</math> by factorising, including rearranging first</li> <li>• Hence identify the roots and sketch a graph of a quadratic function</li> <li>• Solve a quadratic of the form <math>x^2 + bx + c = 0</math> by factorising (REVISION)</li> <li>• Solve problems in context by forming and solving a quadratic equation</li> <li>• Simplify an algebraic fraction that involves factorisation (linear and quadratic expressions)</li> </ul>	<p><b>Simplify and manipulate algebraic expressions by factorising quadratic expressions of the form <math>x^2 + bx + c</math>, including a difference of two squares</b></p> <p><b>Factorise quadratic expressions of the form <math>ax^2 + bx + c</math></b></p> <p><b>Simplify and manipulate algebraic fractions by factorising quadratic expressions of the forms <math>x^2 + bx + c</math> and <math>ax^2 + bx + c</math>, including a difference of two squares</b></p> <p><b>Factorise quadratic expressions of the form <math>ax^2+bx+c</math></b></p> <p><b>Solve quadratic equations, including those that require rearranging, by factorising</b></p> <p><a href="#">Find the roots of a quadratic equation algebraically</a></p> <p><a href="#">Interpret solutions to equations in context</a></p> <p>Identify and interpret roots, intercepts and turning points of quadratic functions graphically</p> <p>Find approximate solutions to a quadratic equation using a graph</p> <p><a href="#">Use graphs to find approximate roots of quadratic equations Identify intercepts and, using symmetry, the turning point of graphs of quadratic functions</a></p>
<b>Mathematics – Unit 7 – Proportion 1</b>	
<b>Knowledge and Skills – Students will be taught to...</b>	Links to KS4 National Curriculum (red) & Exam board specification (blue/black)
<ul style="list-style-type: none"> <li>• Recognise tables and graphs showing direct and inverse proportion (REVISION)</li> <li>• Construct and use simple formulae describing direct and inverse proportion e.g. <math>a = kb</math> (REVISION)</li> <li>• Construct and use formulae for direct and inverse proportion involving powers and roots e.g. <math>a = k\sqrt{b}</math></li> <li>• Solve more complex GCSE-style direct/inverse proportion problems in a range of contexts</li> <li>• Combine ratios in simple cases e.g. find A:B given A:C and B:C (REVISION)</li> <li>• Solve more complex problems involving the combining of ratios</li> </ul>	<p>Recognise and interpret graphs that illustrate direct and inverse proportion</p> <p>Interpret equations that describe direct and inverse proportion</p> <p><b>Construct (and interpret) equations that describe direct and inverse proportion</b></p> <p><a href="#">Recognise and interpret graphs that illustrate direct and inverse proportion</a></p> <p><a href="#">Recognise that if <math>y=k/x</math> then <math>y</math> is inversely proportional to <math>x</math></a></p> <p><b>Formulate equations and solve problems involving a quantity in inverse proportion to a power or root of another quantity</b></p> <p>Identify and work with fractions in ratio problems</p>

<ul style="list-style-type: none"> <li>• Solve complex problems combining understanding of fractions, percentages and/or ratio</li> <li>• Express ratios in the form 1:n or m:1 (REVISION)</li> <li>• Use ratios in the form 1:n to compare proportions</li> <li>• Relate ratios to formulae e.g. <math>2y=3x</math>, what is <math>x:y</math>?</li> </ul>	<p>Find the ratio of quantities in the form 1 : n</p> <p>Understand the relationship between ratio and linear functions</p>
<b>Mathematics – Unit 8 – Data 1</b>	
<b>Knowledge and Skills – Students will be taught to...</b>	<b>Links to KS4 National Curriculum (red) &amp; Exam board specification (blue/black)</b>
<ul style="list-style-type: none"> <li>• Plot points on a scatter diagram, identifying correlation and interpreting the relationship shown (REVISION)</li> <li>• Construct a line of best fit and using it to make predictions (REVISION)</li> <li>• Identify outliers; distinguish these from anomalies (REVISION)</li> <li>• Understand the lack of reliability of making predictions outside the range of the original data (extrapolating)</li> <li>• Estimate a % using a scatter diagram e.g. ‘What percentage passed Maths and English?’</li> <li>• Understand that correlation does not necessarily indicate causation</li> <li>• Use a sample to infer properties of a population</li> <li>• Understand the limitations of sampling</li> <li>• Know what is meant by simple random sampling</li> <li>• Find the quartiles for discrete data sets, and understand the meaning of these</li> <li>• Calculate and interpret the interquartile range</li> <li>• Understand why the IQR is generally a more reliable measure of spread than the range</li> <li>• Construct and interpret a box plot for discrete data</li> <li>• Use box plots to compare distributions</li> <li>• Continue to compare data given in more than one form</li> </ul>	<p>Use and interpret scatter graphs of bivariate data</p> <p>Recognise correlation and know that it does not indicate causation</p> <p>Draw estimated lines of best fit on a scatter graph and use them to make predictions</p> <p>Interpolate and extrapolate apparent trends from a scatter graph, whilst knowing the dangers of so doing</p> <p>Plot and interpret scatter diagrams for bivariate data; recognise correlation</p> <p>Interpret correlation within the context of the variables</p> <p>Draw a line of best fit by eye, and use it to make predictions</p> <p>Interpolate and extrapolate from data, and be aware of the limitations of these techniques</p> <p>Appreciate there may be errors in data from values (outliers) that do not ‘fit’</p> <p>Recognise outliers on a scatter graph</p> <p>Appreciate the distinction between correlation and causation</p> <p>Describe a population using statistics</p> <p><b>Interpret, analyse and compare the distributions of data sets from univariate empirical distributions using quartiles and the inter-quartile range</b></p>
<b>Mathematics – Unit 9 – Algebra 2</b>	
<b>Knowledge and Skills – Students will be taught to...</b>	<b>Links to KS4 National Curriculum (red) &amp; Exam board specification (blue/black)</b>
<ul style="list-style-type: none"> <li>• Solve problems in context by deriving and solving two linear simultaneous equations by elimination, including where one or both equations need to be multiplied (REVISION)</li> <li>• Solve two linear simultaneous equations with fraction/decimal coefficients</li> <li>• Draw a line / lines and shade a region to show an inequality such as <math>x &gt; 3</math>, <math>y &lt; -2</math>, <math>4 &lt; x &lt; 6</math></li> </ul>	<p>Solve two linear simultaneous equations</p> <p>Set up and solve two linear simultaneous equations in two variables algebraically</p> <p>Solve linear inequalities in two variables, representing the solution set on a graph</p> <p>Represent the solution to an inequality using set notation</p>

<ul style="list-style-type: none"> <li>• Draw a line and shade a region to show a linear inequality stated explicitly e.g. <math>y \leq 2x + 3</math></li> <li>• Draw a line and shade a region to show a linear inequality stated implicitly e.g. <math>2x + y &lt; 12</math></li> <li>• Draw lines and shade a region for multiple linear inequalities in two variables</li> <li>• State the inequality/inequalities satisfied by a shaded region on a given graph</li> <li>• Find the set of integer coordinates that are solutions to a set of inequalities in two variables, including representing these using set notation</li> <li>• Find numerical and algebraic outputs from functions defined using a function machine, expression or equation</li> <li>• Use this context to practise arithmetic with large integers, decimals, fractions and negatives</li> </ul>	<p><b>Solve (several) linear inequalities in two variables, representing the solution set on a graph</b></p> <p><b>Identify the solution sets of linear inequalities in two variables, using the convention of dashed and solid lines</b></p> <p><b>Express solutions to inequalities in set notation e.g. <math>\{ x: x &lt; 3 \}</math></b></p>
<b>Mathematics – Unit 10 – Geometric Reasoning</b>	
<b>Knowledge and Skills – Students will be taught to...</b>	<b>Links to KS4 National Curriculum (red) &amp; Exam board specification (blue/black)</b>
<ul style="list-style-type: none"> <li>• Solve problems involving angles on parallel lines, identifying alternate, corresponding and co-interior angles (REVISION)</li> <li>• Know and use the conditions for triangles to be congruent (SSS, SAS, RHS, ASA)</li> <li>• Prove that two given triangles are congruent</li> <li>• Deduce one or more Circle Theorems by investigation</li> <li>• Know the following Circle Theorems, including the wording, and apply them:           <ul style="list-style-type: none"> <li>- The angle at the centre is double the angle at the circumference</li> <li>- Angles in the same segment are equal</li> <li>- The angle in a semicircle is a right angle</li> <li>- Opposite angles in a cyclic quadrilateral add up to <math>180^\circ</math></li> <li>- Two tangents from an external point are the same length</li> <li>- A radius and a tangent meet at <math>90^\circ</math></li> <li>- The perpendicular bisector of a chord is a radius</li> <li>- The Alternate Segment Theorem</li> </ul> </li> <li>• Use the fact that base angles of an isosceles triangle are equal</li> <li>• Create a geometrical proof, including applying circle theorems</li> </ul>	<p><a href="#">Know and use alternate angles or corresponding angles on parallel lines are equal</a></p> <p><b>Apply the standard circle theorems concerning angles, radii, tangents and chords, and use them to prove related results</b></p> <p><b>Know and apply the sine rule and cosine rule to find unknown lengths and angles</b></p> <p><a href="#">Apply angle facts to find angles in rectilinear figures, and to justify results in simple proofs. e.g. ‘The sum of the interior angles of a triangle is <math>180^\circ</math>’</a></p> <p><a href="#">Use the basic properties of isosceles, equilateral and right-angled triangles to find lengths and angles in rectilinear figures and in simple proofs</a></p> <p><a href="#">Apply congruent triangles in calculations and simple proofs. e.g. The base angles of an isosceles triangle are equal</a></p> <p><b>Apply angle properties in more formal proofs of geometrical results</b></p> <p><b>Apply the standard circle theorems</b></p> <p><a href="#">Prove that two triangles are congruent using the cases SSS, ASA, SAS, RHS</a></p>
<b>Mathematics – Unit 11 – Data 2</b>	
<b>Knowledge and Skills – Students will be taught to...</b>	<b>Links to KS4 National Curriculum (red) &amp; Exam board specification (blue/black)</b>

<ul style="list-style-type: none"> <li>• Construct a cumulative frequency curve</li> <li>• Use a cumulative frequency curve to estimate values, including percentages</li> <li>• Use a cumulative frequency curve to estimate the median, quartiles and IQR</li> <li>• Use a cumulative frequency curve to construct a box plot</li> <li>• Understand why a bar chart can be misleading if the class widths are different</li> <li>• Construct a histogram for grouped data with unequal class intervals</li> </ul>	<p><b>Construct and interpret diagrams for grouped discrete data and continuous data, including cumulative frequency graphs and histograms with equal and unequal class intervals, and know their appropriate uses</b></p> <p><b>Interpret, analyse and compare the distributions of data sets from univariate empirical distributions using box plots</b></p> <p><b>Interpret and construct diagrams for grouped data as appropriate, including cumulative frequency graphs and histograms (with either equal or unequal class intervals)</b></p> <p><b>Draw and interpret box plots</b></p>
<b>Mathematics – Unit 12 – Number</b>	
<b>Knowledge and Skills – Students will be taught to...</b>	<b>Links to KS4 National Curriculum (red) &amp; Exam board specification (blue/black)</b>
<ul style="list-style-type: none"> <li>• Find the HCF/LCM of two numbers using prime factor form (REVISION)</li> <li>• Solve practical problems involving HCF or LCM</li> <li>• Solve GCSE-style problems where numbers are given in prime factor form</li> <li>• Practise using the FACT function on a scientific calculator</li> <li>• Identify bounds and error intervals (inequalities) for both discrete and continuous quantities which have been rounded or truncated to the nearest integer, 10, 100, 5, 20 etc., or to a given number of significant figures (REVISION)</li> <li>• Identify bounds for discrete/integer quantities (REVISION)</li> <li>• Truncate a decimal number to a given number of decimal places</li> <li>• Write an error interval for a value that has been truncated</li> <li>• Solve simple problems involving one truncated quantity</li> <li>• Solve a bounds problem involving more than one rounded measurement</li> <li>• Convert a recurring decimal of the form <math>0.\dot{x}</math>, <math>0.\dot{x}\dot{y}</math>, or <math>0.\dot{x}yz</math> to a fraction</li> <li>• Convert a recurring decimal of the form <math>0.0\dot{x}</math> or <math>0.0\dot{x}\dot{y}</math>, to a fraction</li> <li>• Check the result by using division to convert back to a decimal, without a calculator where appropriate</li> </ul>	<p><a href="#">Identify prime numbers</a></p> <p><a href="#">Use power notation in expressing a whole number as a product of its prime factors</a></p> <p><a href="#">Find the HCF and LCM of two whole numbers from their prime factorisations</a></p> <p><a href="#">Use inequality notation to write down an error interval for a number or measurement rounded to a given degree of accuracy</a></p> <p><a href="#">Apply and interpret limits of accuracy</a></p> <p><b>Calculate the upper and lower bounds of a calculation using numbers rounded to a known degree of accuracy</b></p> <p><b>Understand the difference between bounds of discrete and continuous quantities</b></p> <p><b>Apply and interpret limits of accuracy when rounding and truncating</b></p> <p><b>Change recurring decimals into their corresponding fractions</b></p> <p><b>Convert a recurring decimal to an exact fraction</b></p>
